Effects of Alkaline Water (Key Medical Research Findings)

Electrolyzed Reduced Water, also known as Alkaline Reduced Water

**Showed Significant Anticancer Effect**

**Protects Genes, DNA from Free Radical Damage**

**Alkalizing Ability**

Source: From third-party research

Alkaline Reduced Water Showed Significant Anticancer Effect

Alkaline reduced water (ARW) showed significant anticancer effect. Mice fed with ARW showed tumor growth delay and the survival span was significantly lengthened. ARW also showed the inhibition of metastasis by reducing the numbers of B16 melanoma colonies.

What Is Cancer?

There are over 100 types of different cancers, which can affect just about every organ in a human body. All parts of the body, such as organs, muscles, skin, even bones and blood, are composed of cells.

Healthy, normal cells are constantly multiply and dividing into new cells to replace old damaged cells.

However, if this order process is disrupted, cells begin to grow out of control. They form excess tissue known as tumor. There are two types of tumor, benign tumor and malignant tumor.

**Two Types Of Tumor**

**Benign Tumor - Not Cancer**
- Do Not Spread To Other Organs
- Could Be Removed
- Usually Not Life Threatening

**Malignant Tumor - Cancer**
- Will Spread & Invade Other Organs
- Spread Through The Blood or Lymphatic System
- Destroy Surrounding Tissues & Nearby Organs
- Cancerous

Did You Know?

- Cancer patients' pH level is acidic.
- Cancer cells thrive in acidic environment.
- Cancer cells can not grow if pH level is alkaline.
- Cancer Cells feed on sugar.
- Negative emotions, like stress, can also produce an acidic environment.

Metastasis - Spreading of Cancer Cells
The spreading of cancer cells from its original site is known as metastasis.

Metastasis can be a slow process, occurring over a number of years or it can happen rapidly within a few weeks.

Left untreated, cancer cells continue to grow, invade and spread, taking over and destroying the organ where they originate as well as those to which they spread and metastasize. As this happens, the person will eventually experience the symptoms related to the organ affected.

**Gene & Cancer**

Since it is the genes that regulate the normal orderly behavior of cells, abnormality or damage to cells genetic component caused them to behave abnormally and become cancer.

In some cases, people have inherited genes that may predispose them to cancer.

While in other cases, genes are damaged by external, environmental factors, such as smoking, exposure to chemicals or ultra-violet radiation and perhaps even viruses.

**Free Radical Damage & Cancer**

Cancer is thought to be the result of reactions between free radicals and DNA, disrupting the gene regulating ability. This causes mutation in cell cycle and eventually leads to the formation of malignant tumor, cancer.

**Acid & Cancer**

When blood becomes acidic, the body will deposit the excess acid to other areas of body in order to maintain blood in a near-alkaline condition. As the cycle continues, the acidity level of these areas will rise significantly and some normal cells will die. The dead cell will then turn into more acids.
However, some cells survive the acidic environment and become abnormal, malignant, cancer cells.

Why Cancer Comes Back?

Even though some type of cancer cells can be eliminated by operations or therapies, the cancer cells grow back because the acidic surrounding still remains after the operation. And at the same time, the cells of the human body try to remedy this by turning them into cancer cells. To prevent this situation, the accumulation of acidic waste must be stopped and maintain body's pH at a slight alkaline level (by alkaline foods and alkaline water).

Symptoms

- Persistent Fatigue (more common in advanced cancer)
- Breast Lump
- Vaginal Bleeding (after sex or between periods)
- Chronic cough or blood-tinged saliva
- Lumps in testicles
- Unexpected weight loss, fever
- Still feel the need to have a bowel movement even after having one already
- Urination Change (frequent urination, small amounts of urine, slow urine flow)
- Persistent itching of genital or anus
- Pencil-thin stools
- Blood in urine
- Unusual, unrelenting Headaches (brain tumor)
- Continuous diarrhea
- Hoarseness
- Lower back pain (ovarian, colon cancer)
- Blood in stool
- Swollen glands or persistent lumps
- Shoulder pain (lung cancer)
- Unexplained anemia (low red blood cells)
- Swallowing difficulty (esophagus cancer)
- Stomach pain (stomach, pancreatic cancer)

Common Treatments

Surgery

Surgery is performed to remove tumor as much cancerous cells as possible. It is often used in conjunction with chemotherapy or
radiation therapy.

**Chemotherapy**

It uses drugs to kill cancer cells but it also affects the entire body.

Side Effects:

- Hair loss all over the body
- Nausea
- Erectile dysfunction
- Vaginal Infections

**Radiation Therapy**

It uses radiation to damage cancer cell's DNA but nearby cells will also be damaged.

Side Effects:

- Fatigue
- Skin problem
- Loss of appetite.

**KANGEN CANCER TESTIMONIALS**

From Terminal Cancer to Terrific Health

"You Are Terminal . . ." There Is Nothing Else We Can Do To Cure You"

What would you do if you heard these words? In June of 1999, I was given no hope by the medical community for my nonhodgkins tcell lymphoma. Shocking news to hear, that after 3 years of the best cancer treatments known to the medical community, there was nothing left to try to cure my disease.
I had followed my doctors' advice and had gone through various tortures trying to control the cancer that was threatening my life.

Here is a brief list of my cancer ordeal:

* Signs of heart failure, kidney failure, and liver failure
* Cancer found in my bones and all my organs (Stage 4 - there are only four stages)
* Fevers as high as 105.4 degrees
* Removal of my spleen
* Night sweats and day sweats
* “Gallons” of chemotherapy and huge amounts of steroids
* Extreme nausea and stupor from the toxins used to “treat” my body
* Bone marrow/stem cell transplant
* Loss of hair, weakened eye site, loss of weight, wasted muscles and muscle weakness, loss of feeling in my fingers, painful sores in my mouth and throat.
* With My Immune System Severely Compromised And Cancer Winning The War, The Doctors Offered No Hope
* Chemotherapy was killing me as it attempted to kill the disease.

At this point, I knew that I needed to find a way to regain my health. I began to explore health alternatives by learning everything that I could about natural treatments for cancer. I read books and spoke to various health practitioners and especially cancer survivors.

Since cancer had devastated me financially, my first question of these health experts was how to use my limited monetary resources for maximum gain.

From These Interviews With Health Experts I Discovered 5 Simple Steps To Maximize Health And Achieve Victory Over Sickness

* **DETOXIFY** your body to remove normal acidic waste products accumulated daily, plus remove toxins accumulated in your body from your environment, prescription drugs, unnatural foods and from the “normal” process of aging. Detoxifying removes the stress from having to deal with toxins and lets your body focus on rebuilding health.
* **HYDRATE** your body; this is basic to maintain or regain optimum health.
* **OXYGENATE** your body; since cancer and most other illnesses cannot survive in an oxygenated environment.
* **ALKALIZE YOUR BODY PH** - from acidic to alkaline pH, because cancer and many other illnesses cannot live in alkaline conditions. Alkaline is the "normal" state of healthy persons.
* **ENHANCE YOUR IMMUNE SYSTEM** to maximize your body's ability to fight off disease and heal itself.

In my search for low cost effective, ways to cure myself of nonhodgkins tcell lymphoma and restore my health, I discovered (among other things) the benefits of ionized alkaline water.

"How Ionized Alkaline Water Addresses These 5 Simple Steps For Assisting The Body To Regain Health And Vitality"

* **DETOXIFICATION** Ionized Alkaline Water helps to naturally flush toxins and acidic waste from your body and is a powerful antioxidant. Water is one of the best sources for detoxification.
* **HYDRATION** - during ionization your alkaline water filter forms your water into microclusters that are more easily absorbed at the cellular level thus "super hydrating" your body.
* **OXYGENATION** Ionized Alkaline Water makes more oxygen available to your cells than distilled, reverse osmosis, filtered only, bottled or tap water. Cancer doesn't thrive in an oxygenated body!!!!
* **ALKALIZE YOUR BODY PH** - Alkaline Ionized Water will help to optimize your body's pH. You could try to achieve an alkaline state with foods but alkaline water will turbo charge your efforts. As a result, it enables your body to better absorb and utilize nutrients, minerals and supplements.
* **ENHANCE YOUR IMMUNE RESPONSE** - All of the above allow your immune system to respond more appropriately and rapidly to it's many daily challenges.

I generally drink 80 ounces of 8.5 to 9 pH ionized alkaline water along with at least 3/4 teaspoon of Celtic sea salt in my diet each day"

If you are like most Americans, your body needs more water. Why not drink the best tasting water which is, also, the best water for your body?

Since my death sentence, pronounced by the medical community, I have gone from a terminal cancer patient to a terminal cancer survivor. My body shows no signs of non hodgkins tcell lymphoma.

"My health and vigor have returned!!!!!"

I believe **Ionized Alkaline Water has been a major contributor to my surviving cancer** and to my regaining and maintaining my good health. It has, in fact, replaced (or allowed me to cut down on) many expensive supplements that I used to take.

Dave Perkins
Terminal Cancer Survivor
My name is Eddy. I live in Kansas City, Kansas. In August of 2006, I was diagnosed with a brain tumor and underwent surgery twice to have it removed and subsequently it was identified as an aggressive melanoma. Six weeks later the tumor grew back and I underwent a third surgery. While recuperating I learned about the health benefits of Kangen™ water and started drinking the water.

I went to MD Anderson in Houston for another opinion. Upon reviewing the tests they stated that I had six months to live. The cure rate on this type of cancer was 20%. I returned home and continued the regimen of drinking Kangen™ water and ate as nutritionally as I could. I also had 16 whole brain radiation treatments and chemotherapy. The last CT scan of the brain showed no reoccurring tumor.

All I can say is I know the Kangen™ water has helped me. I don’t think I would be where I am had it not been for prayer and getting my body back in balance with Kangen™ water.

Mark Kliens lymphoma cancer is GONE!! I just got off the phone with Mark Klien after I received an email from his wife. Mark was referred by Doctor Anna Gravich in Beverly Hills to me and believes that Kangen water works. He has been drinking the water for 2 1/2 months and purchased the SD-501. He has already referred 5 people already. His former wife Barbara is getting a unit as well. I am very excited -"Jon Swandstrom

" I just got a text message from Patty Webb on the results from her doctor regarding the 403 pt drop in her cal25#. Her count had a 19pt drop when she started back on the water at 8.5 and a drastic drop of 403pts in a two-week period when she started on the 9.5 water!!! Her doctor said that it was not normal for that to happen and he was very surprised and she thanked me for as she said " taking a chance on me." She is almost in the safe zone now with her cancer count at 69, safe zone being 0-35. We will see what the next test shows and hopefully her body will have the support it needs to get rid of this ovarian cancer that she has been told is terminal and there is no cure for. Our bodies have such an amazing ability to heal themselves if we support that healing process. I am so excited about the news that I had to tell all of you about it. " Love to you all, Donna

" This is an email from Maureen Pierce. Her husband has liver cancer. He became immune to the chemo therapy treatment. The doctor has had told him that he should go to UCLA to get a very strong chemo treatment at $10,000.00 per week. He had the cancer for the past 2 years and it has gotten worse. He went off the chemo treatment for the past 2 months. I got a phone call from Maureen this morning and this is the e-mail. She was extremely excited!

Hi Jon! We got the numbers back today, and we have GREAT NEWS!!!!! His numbers have gone down from 50 to 35 -AMAZING!!!! and we honestly attribute it all to the Kangen water!!!! This is one of the HARDEST cancers to combat also! I'm so grateful for that water, Jon! Please pass this news on to your skeptical friends!!!! " - Fondly, Maureen & John

" Dear friends, In December 2007, I had a health scare that you can probably all relate to. I had detected several lumps in one of my breasts, which prompted me to schedule an appointment with a gynecologist. After having a mammogram, ultra sound, and MRI, she told me the bad news that it appeared I had stage 2 breast cancer.

After consulting with a surgeon, the doctors had some questions and decided to redo the test notwithstanding the clear presence of several highly suspicious growths. To their complete amazement, when the tests were repeated, all the growths had disappeared! When they questioned me about this and asked if I was doing anything differently, I told them for about three months, I had been drinking at least two quarts of Kangen water daily.

My experience is that although most doctors tend to be somewhat skeptical about anything other than pills and surgery, they readily agree that "whatever you're doing, keep doing it of course". There is absolutely no way that I will stop drinking Kangen water especially since my other health problems including fibromyalgia, asthma, and acid reflux are no longer apparent and I have stopped taking all medications.

I strongly encourage all my friends and loved ones to experience the many benefits of using Kangen water. I love giving them this wonderful water and having then tell me how much better they feel after just a few weeks of drinking it. - Martha Shafarn (May 21, 2008)
